MCP Access

Enable MCP
Enable MCP access to this n8n instance

How to connect

OAuth   **Access Token**

1. Enable workflow access in at least one workflow via its settings

2. Server URL: `https://hadayalab.app.n8n.cloud/mcp-server/http`

3. Access token: `******SXGw` ↻ ⓘ

Or use the following code in your 'mcp.json' file ⌃

```
{
  "mcpServers": {
    "n8n-mcp": {
      "command": "npx",
      "args": [
        "-y",
        "supergateway",
        "--streamableHttp",
        "https://hadayalab.app.n8n.cloud/mcp-server/http",
        "--header",
        "authorization:Bearer <YOUR_ACCESS_TOKEN_HERE>"
      ]
    }
  }
}
```

For more detailed instructions and examples, have a look at our docs

Available Workflows (0)   ↻

No workflows available for MCP

Enable MCP access in each workflow's settings to see them here.
